### **DETAILED ACTION**

Claims 1-10 have been examined.

#### ***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be “material to patentability as defined in 37 CFR 1.56.” That is, the oath/declaration states 37 CFR 1.56(a).

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Jones (US 5,666,501).

#### **Per Claim 1:**

The Jones patent discloses:

- An information recording apparatus which has a predetermined design specification, has a recording means by which the information recorded in a recording medium is recorded in a

predetermined area of the recording means ("... icon 212 represents a CD ROM on the local machine ..." in col 3 lines 15-28)

- a selection means for selecting the predetermined area based on a predetermined design specification of the recording means, and the information is automatically recorded in the predetermined area ("... The user may select one or more bundles ..." in col 3, lines 39-52).

**Per Claim 2:**

The Jones patent discloses:

- wherein it has an identification information detection means for detecting whether the identification information for identifying the recording medium is attached to the recording medium, and when the identification information is attached to the recording medium, the selection means is conducted, and the information is automatically recorded in the predetermined area (col 3 lines 28-40).

**Per Claim 3:**

The Jones patent discloses:

- wherein the design specification of the recording means is the functional structure of the recording means, physical structure or logical structure (col 3, lines 39-45).

**Per Claim 4:**

The Jones patent discloses:

- wherein the selection means, when the recording means is structured from a plurality of recording means which are physically separated, selects a recording means different from the recording means in which the basic software of the information recording apparatus and/or an application software is stored, as the predetermined area (col 3, lines 39-52).

**Per Claim 5:**

The Jones patent discloses:

- wherein the selection means, when the recording means is structured by the recording means having a plurality of recording sections which is logically separated, selects a recording section different from the recording section in which the basic software of the information recording apparatus and/or an application software is stored, as the predetermined area (col 3, lines 4-45).

**Per Claims 6-10:**

These are program versions of the claimed apparatus discussed above (claims 1-5, respectively), wherein all claim limitations also have been addressed and/or covered in cited areas as set forth above. Thus, accordingly, these claims are also anticipated by Jones.

***Conclusion***

Any inquiry concerning this communication from the examiner should be directed to Qamrun Nahar whose telephone number is (571) 272-3730. The examiner can normally be reached on Mondays through Fridays from 10:00 AM to 6:30 PM.
